Mariusz Opala

General manager, CEO

In our family, good and healthy sleep has been a priority for years. In the 1960s we decided to make it our profession. The first family company was established, which, after gathering a lot of experience in the Polish and foreign markets, was transformed into the PolcruX Group in 2004. We hired the best specialists and expanded our range services and merchandise in order to comprehensively take care of our customers' sleep. We decided to focus on high quality and professional advice, so that each customer of ours leaves richer in knowledge and equipped with a product tailored to their needs.

In 2004, we transformed into the Polcrux Group.

Today we introduce you to our most recent creations - Naturwell and Goodreams mattresses. They have been classified as Class 1 medical products.

They are excellent in preventing back pain and locomotor system defects and also support rehabilitation for postural defects. They are also perfect for repeated and long-term use during sleep and rest.

We have tested all the products ourselves and recommend them not only as sellers, but above all as active users.

naturwell

Mattresses for people who value uniqueness and want to be closer to nature. The brand is appreciated by Polish and European customers. Our products are made exclusively from natural raw materials such as rubber milk, organic cotton, sheep wool, linen, coconut, and straw. They belong to a unique brand, created for customers who care about their health and the well-being of our planet.

With the Naturwell product line, we initiated a campaign aimed at greening the world. Together with a tree planting organization, we have committed that every Naturwell Basic mattress you buy from us is one tree planted for the good of our planet.

As nature lovers, we have also partnered with local apiaries and actively support their development.

naturwell

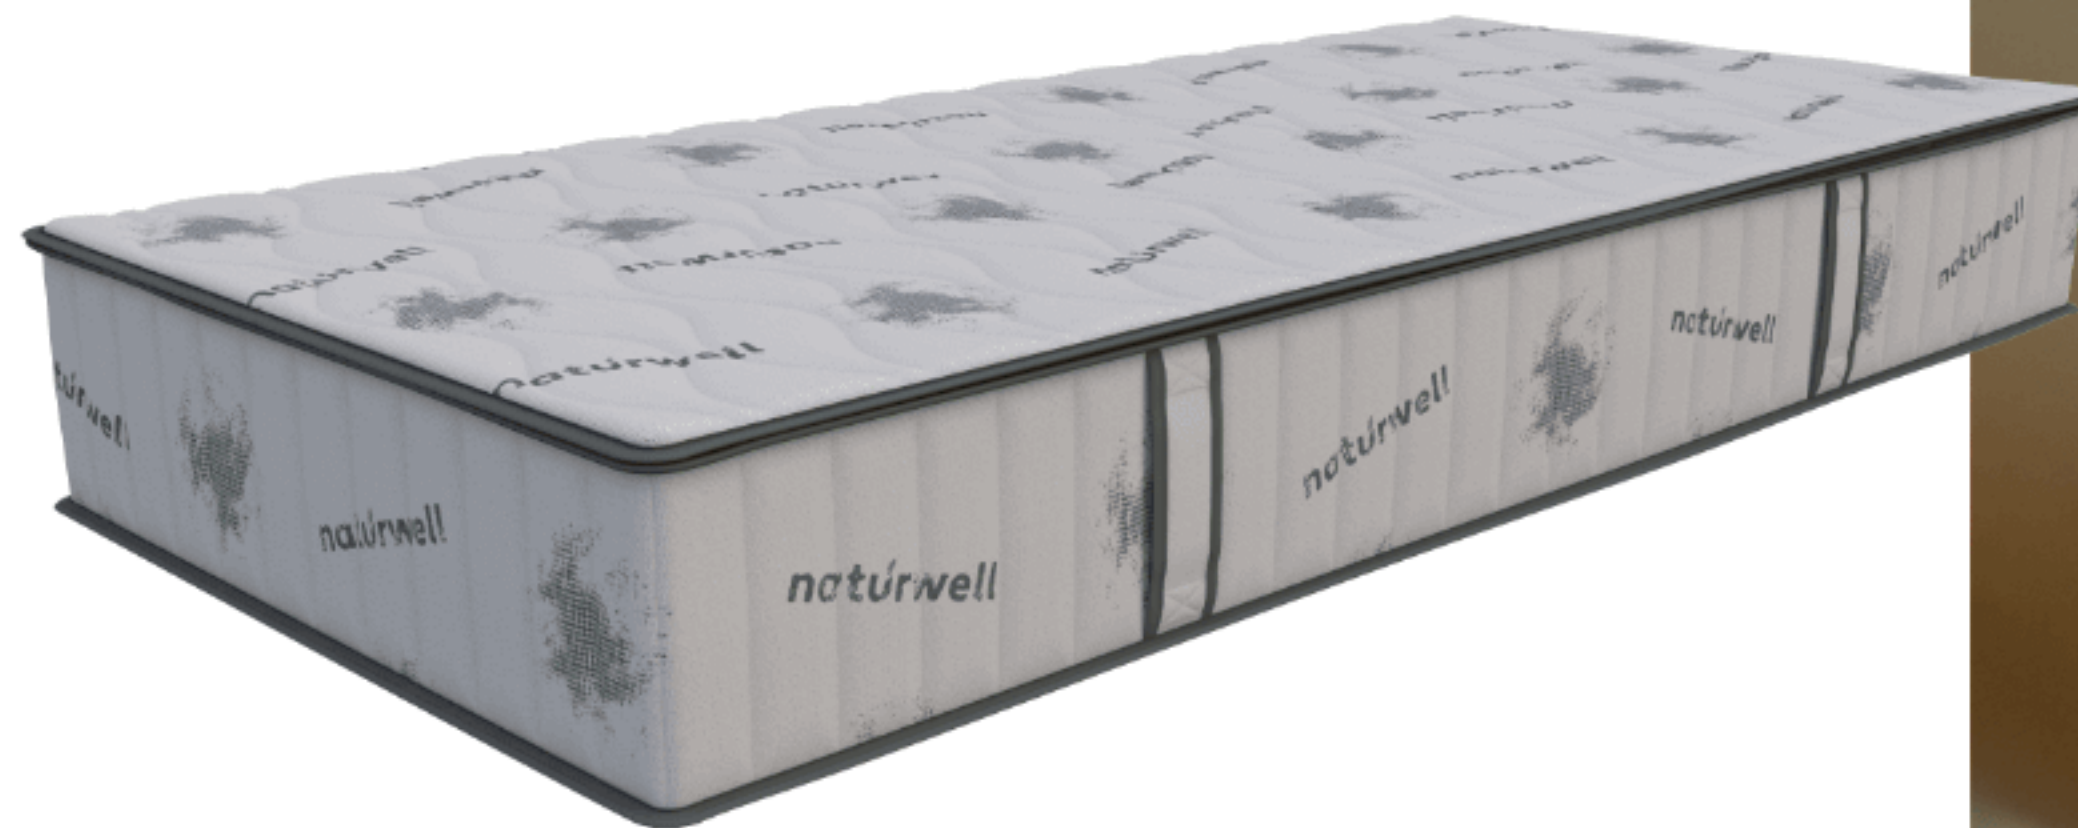

Naturwell Basic mattress

The creme de la creme of our offer.

Manufactured from excellent natural raw materials:
cotton, wool, viscose, 100% rubber milk foam,
and coconut mat.

It is an exclusive product for all those who not only appreciate
high quality and comfort, but above all choose a healthy,
pro-environmental lifestyle.

naturwell

Every Naturwell Basic mattress you buy from us
is one tree planted for the good of our planet.

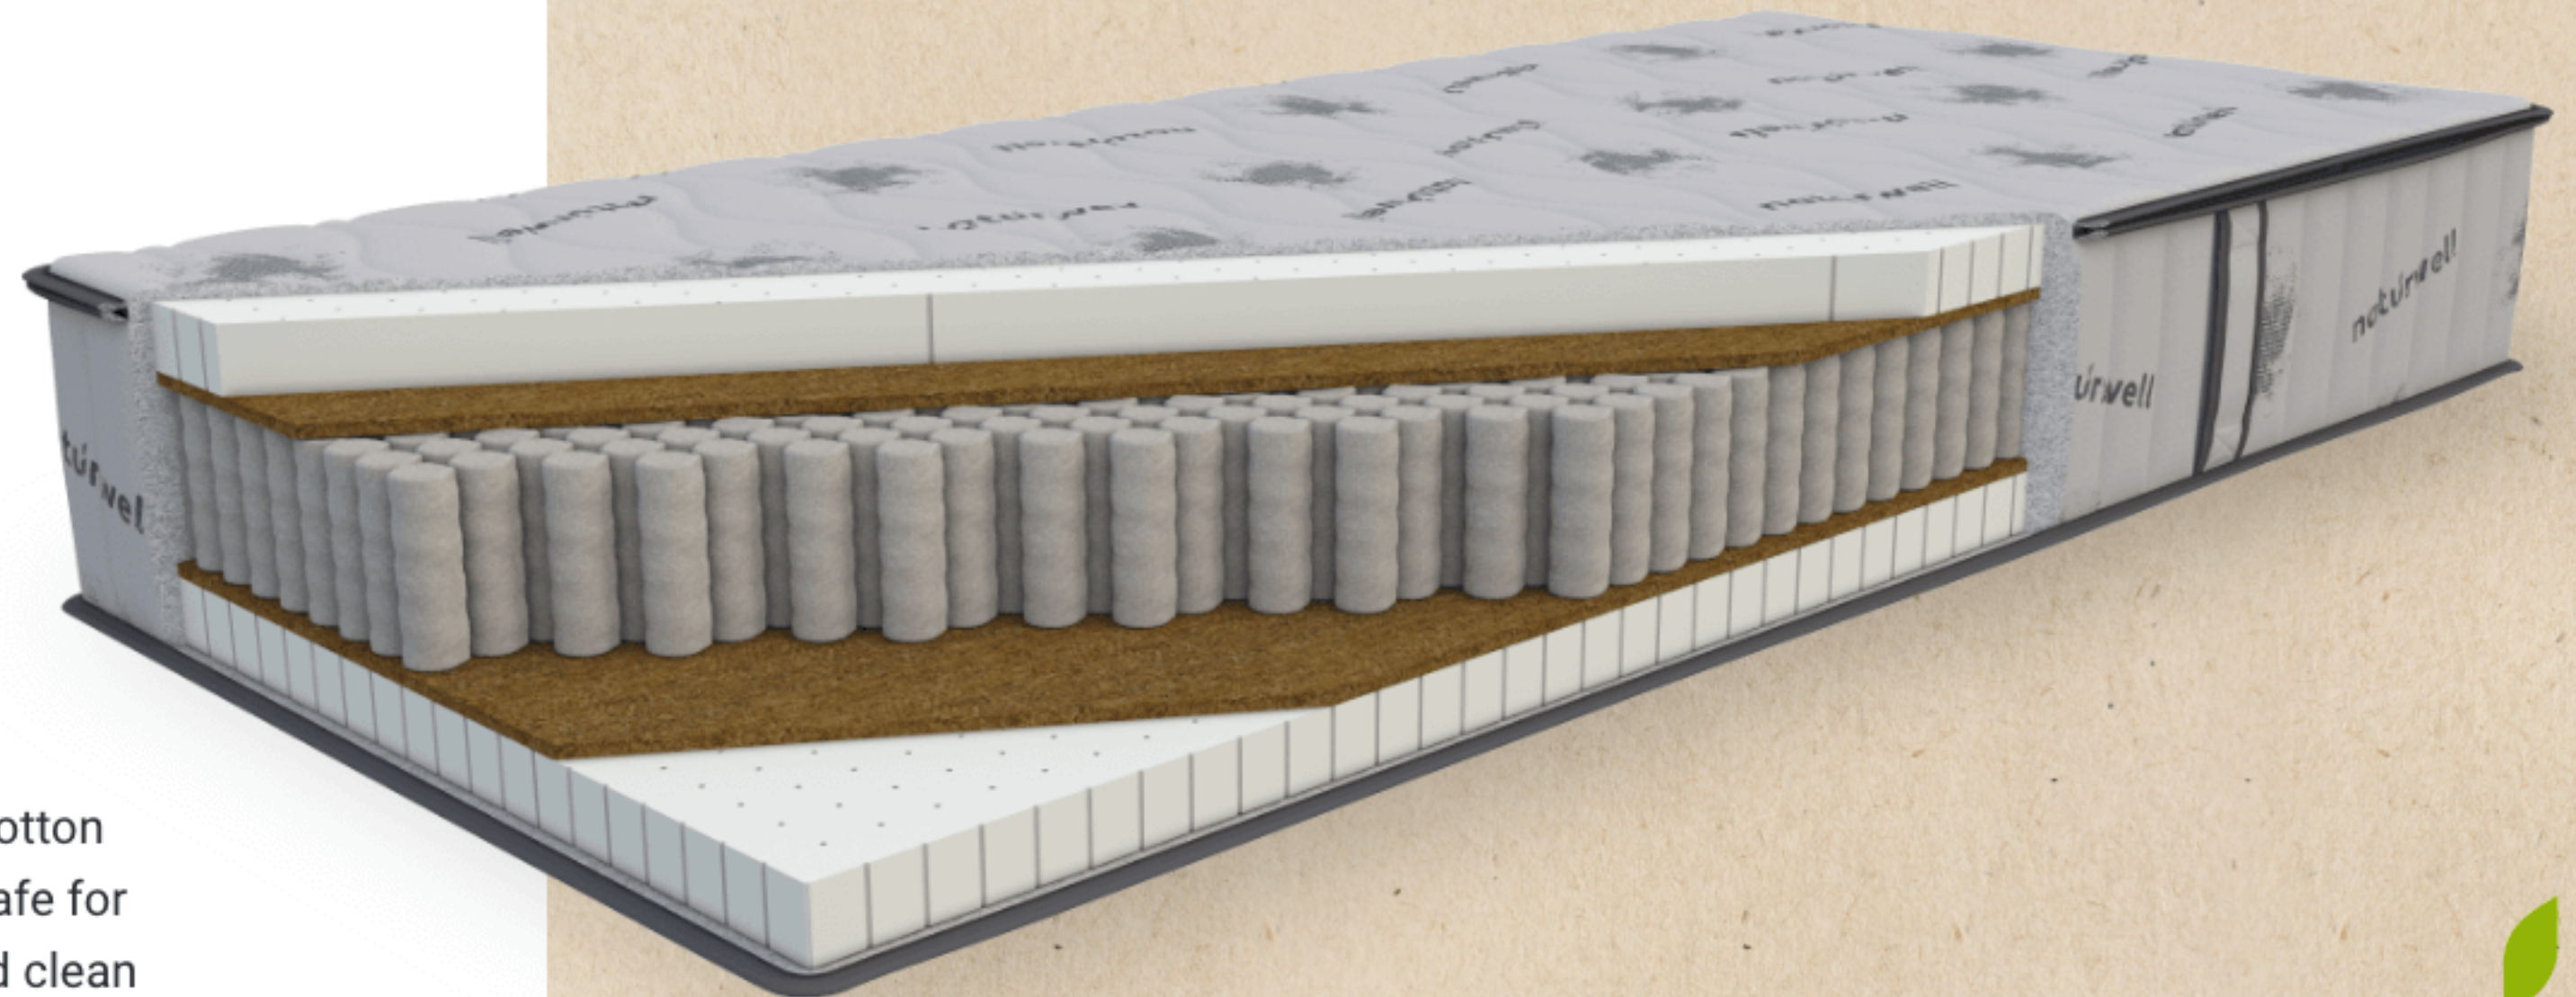

Naturwell Basic mattress

The heart of the mattress consists of solid steel springs in a pochette made of cotton canvas that has not been bleached with chlorine, which makes it biologically harmless.

It is surrounded by environmentally friendly coconut mats, and the whole is enclosed in layers of latex foam with a density of up to 90 kg/m³.

The functional cover, sewn only from the highest quality biodegradable products, such as viscose, cotton and wool, provides comfort and relaxation and is safe for the environment. It is extremely easy to remove and clean thanks to the zippers installed on two sides (top and bottom) that let it unfold into 3 parts.

Perfectly designed to meet the most sophisticated needs.

The mattress provides the user with great support for their spine and their entire body. It is ideal as a support in preventive health care, as well as for people with musculoskeletal system diseases.

The Naturwell Basic mattress is a luxurious Class 1 medical device that comes with a CE declaration of conformity.

By choosing a product of this class, the user has a guarantee of great quality materials and a well-thought-out, perfect design.

This is a mattress for connoisseurs of a good night's sleep who want to actively participate in the renewal of nature.

naturwell

GOODREAMS – for anyone looking for a mattress to last for years. This brand is characterized by excellent quality products and affordable prices. It is intended for people who are looking for elegant and modern design combined with comfort of use.

The wide range of Goodreams products includes mattresses, pillows, frames, headboards, and other bedroom accessories, and everyone who values quality sleep will find something unique within it.

ORGANIC MATTRESS

Its biggest advantage is the high density multipocket springs (500 units/m²), that adapt to the shape of the body, providing the user with ideal support for the spine (the so-called point flexibility).

High quality raw materials used for making the mattress ensure stability of the base, preventing deformation and bending. As a medical product, the mattress can also be used by people with musculoskeletal problems.

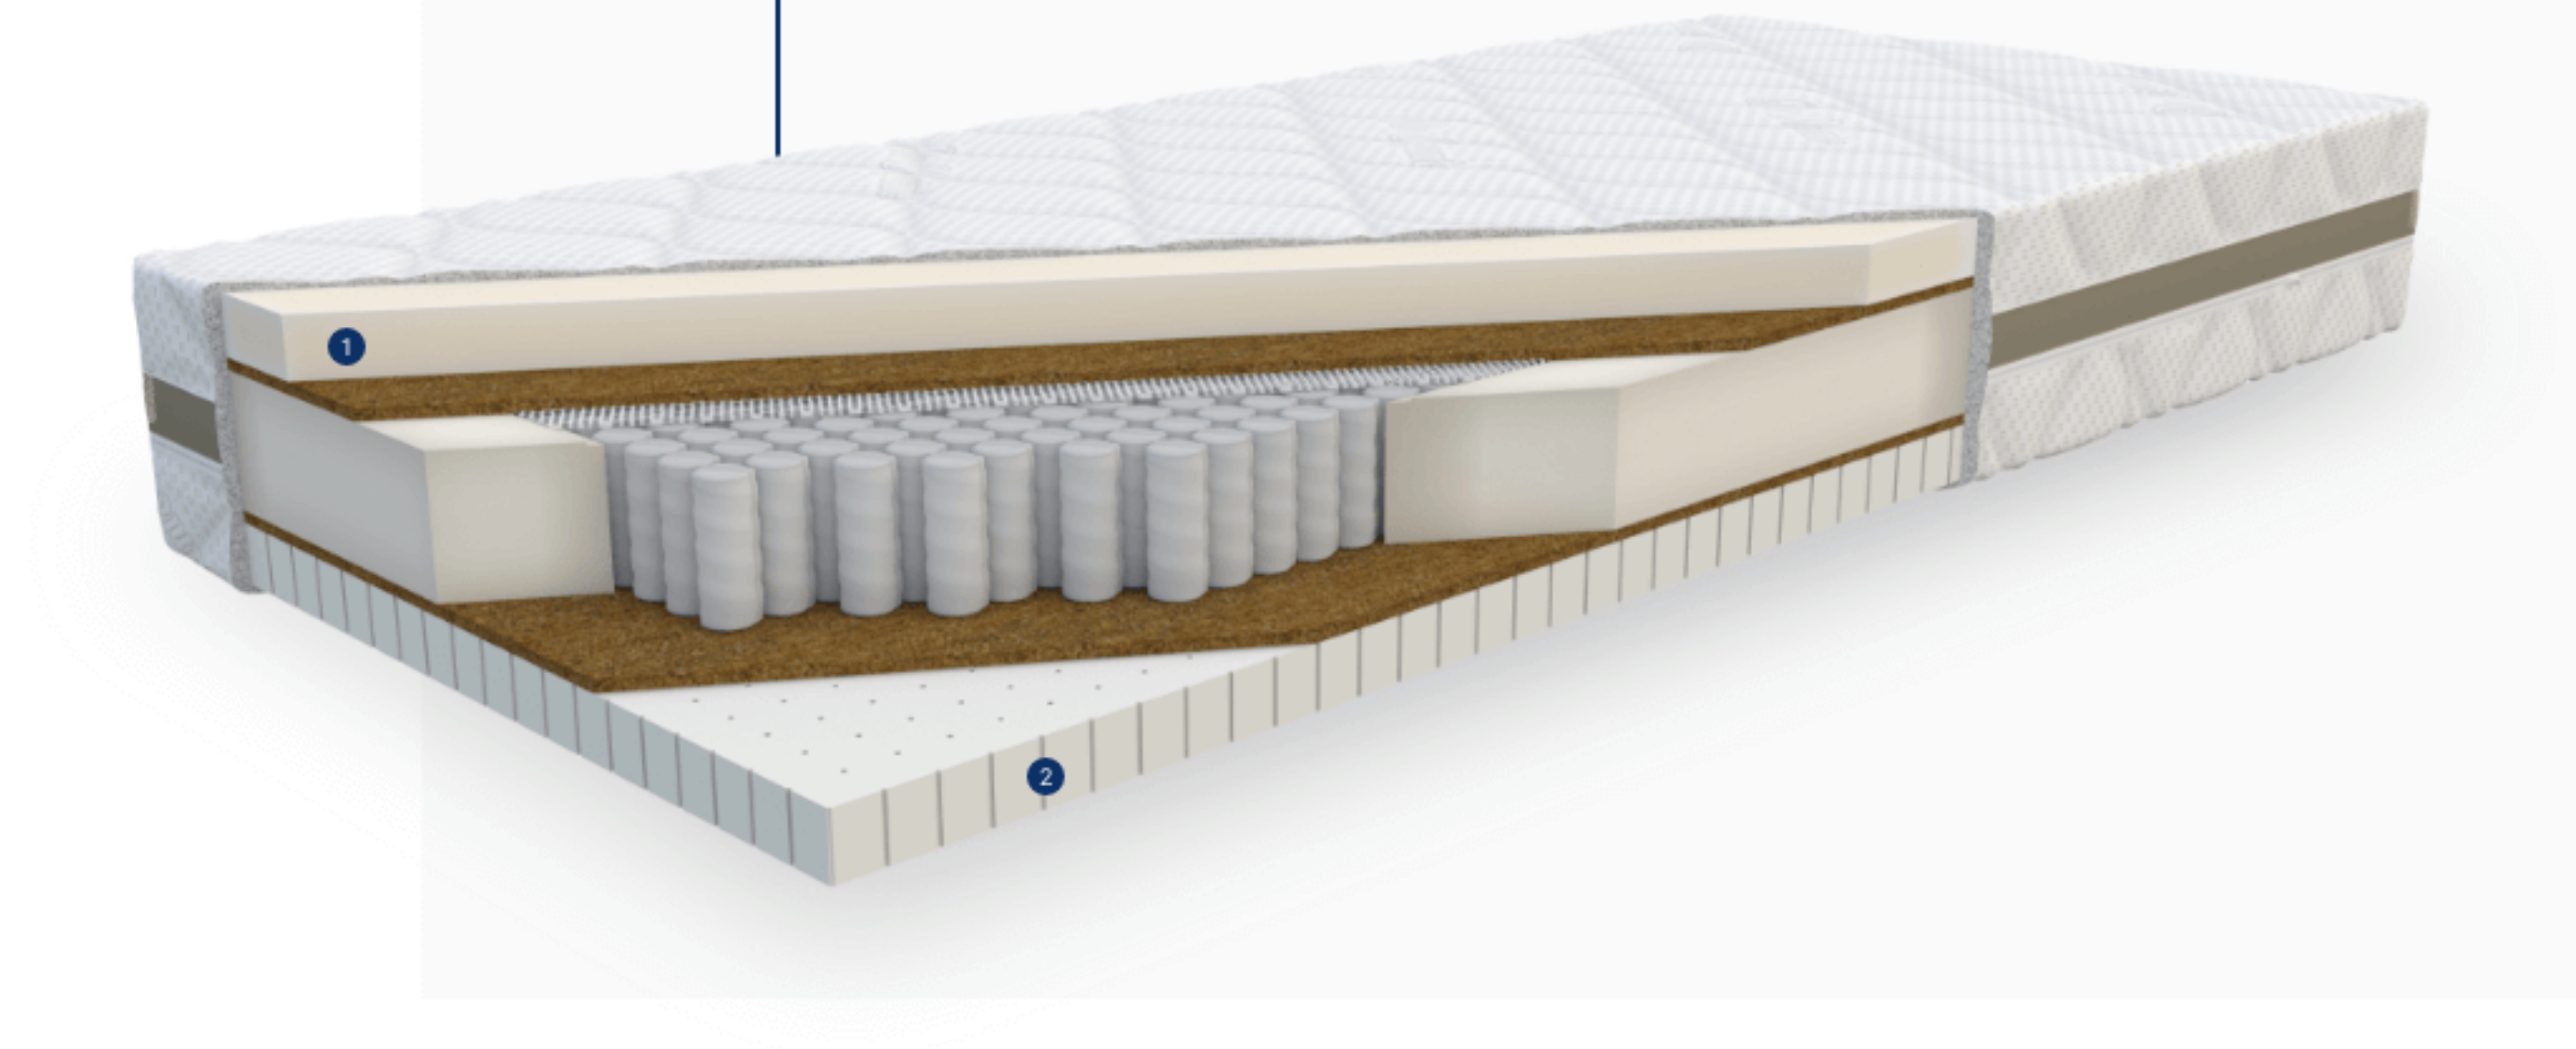

Pleasant and comfortable use is also guaranteed by the BioOrganic cover made of natural raw materials.

It is sewn from a knitted fabric consisting of bamboo and cotton yarns and quilted on a cotton insert. The whole is closed with a zipper.

goodreams.eu

An extremely durable, two-sided foam-spring mattress with a thickness of 24 cm, dedicated to demanding customers.

- ① Memory foam (visco)
- ② Latex foam

It is manufactured in two variants:
hard (with coconut mat) and medium hard (with felt).

This mattress is a Class 1 medical product, recommended by physiotherapists. It is also suitable for children.

ORTOPEDIC MATTRESS

The 7-zone HR50 foam is characterized by high flexibility and elasticity. The use of 7 hardness zones guarantees comfortable sleep for everyone, but especially for people with various musculoskeletal disorders.

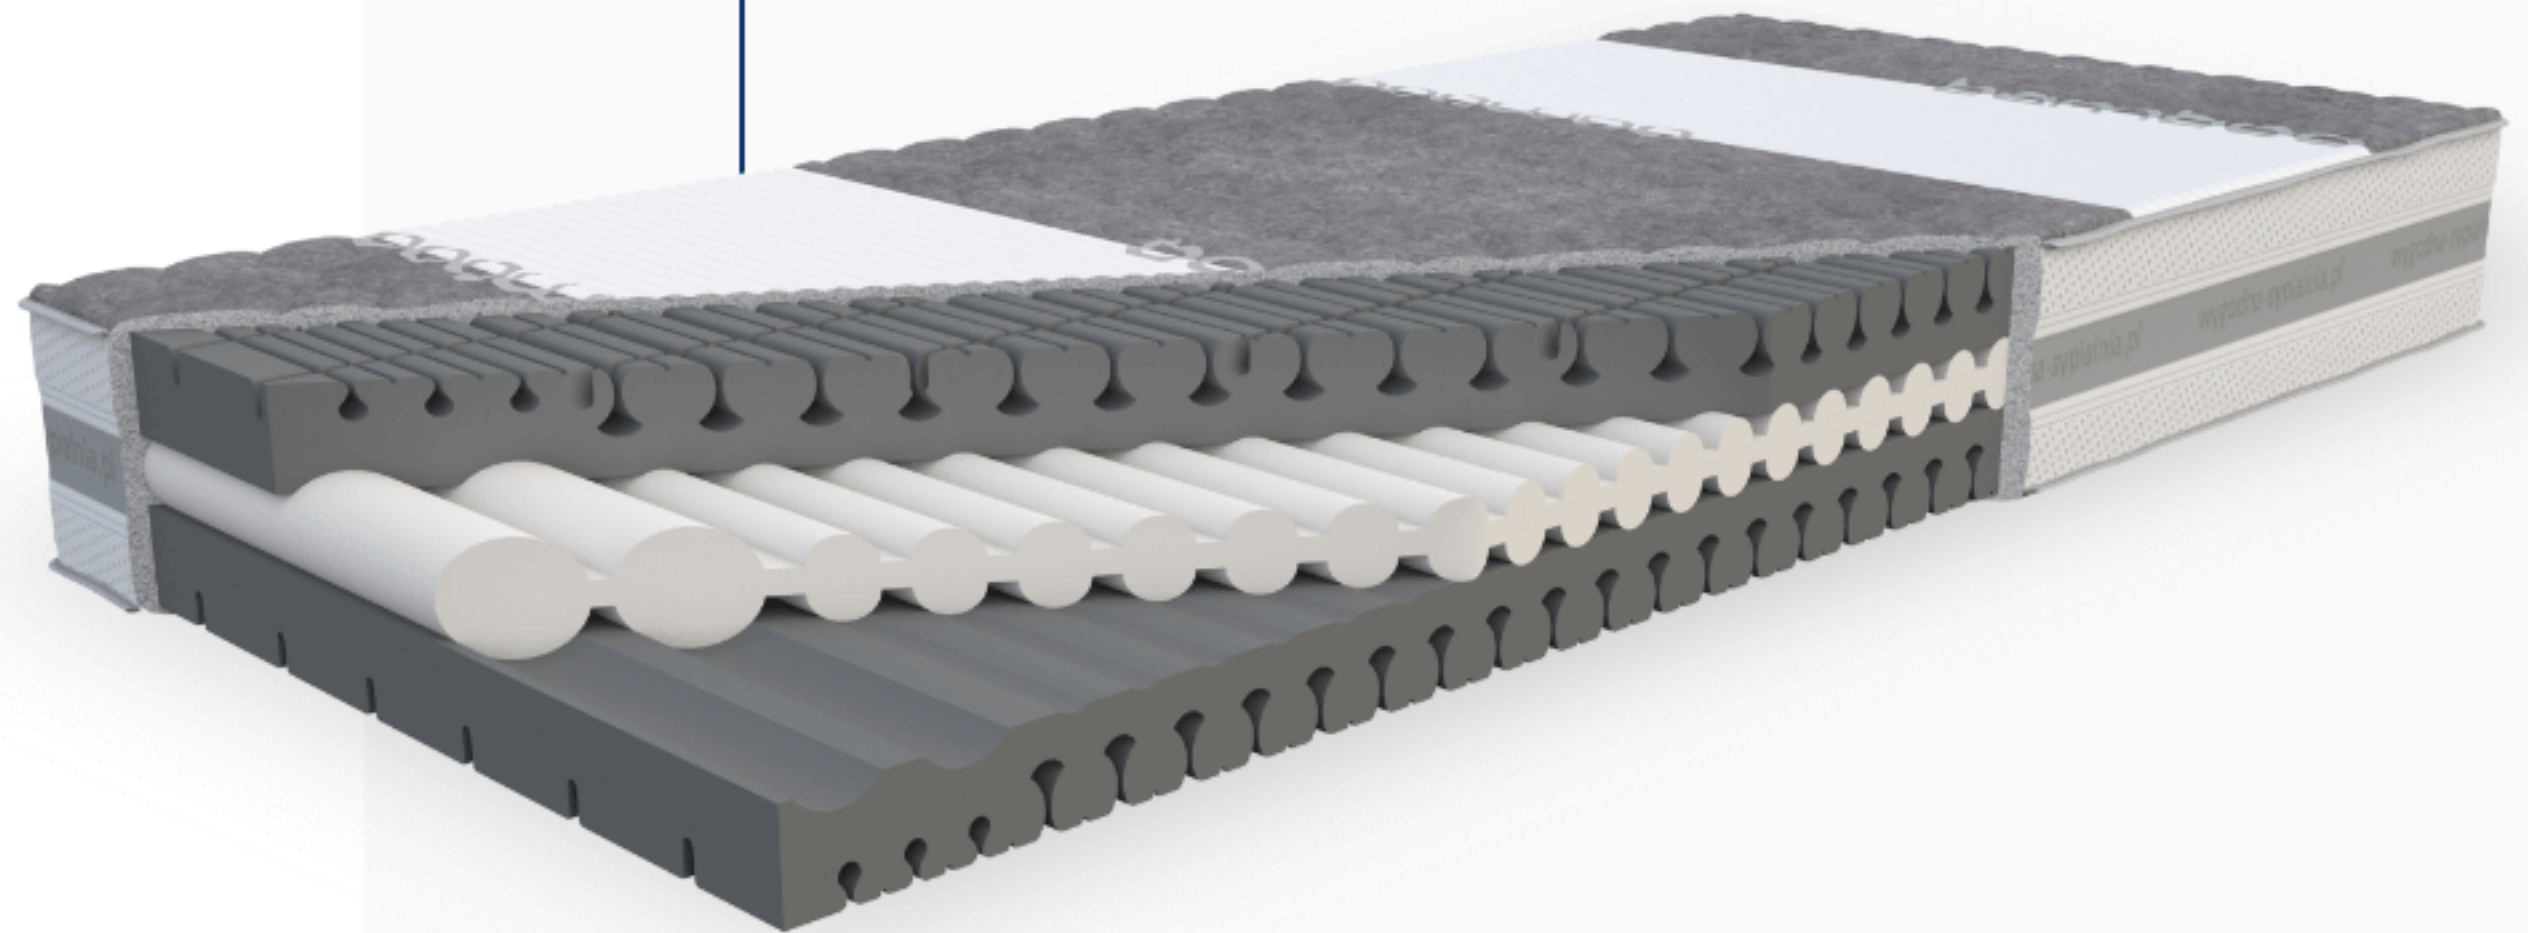

An additional advantage of this mattress is the bubbled, open-cell structure of the foam, which guarantees ventilation and breathability.

This prevents the growth of mould or mildew, making the mattress perfect for people suffering from allergies.

The two-colour, buttoned-up Bamboo cover, sewn from bamboo viscose and quilted on cotton fleece, contributes to its visual appeal. It is very pleasant to the touch and, above all, has antibacterial properties and is highly permeable to moisture.

A 20 cm thick foam mattress, the most important feature of which is the 7-zone HR50 polyurethane foam.

This mattress is a Class 1 medical product, recommended by physiotherapists. It is also suitable for children.

TENDER MATTRESS

The customer can be sure that **this mattress will serve them reliably for many years.**

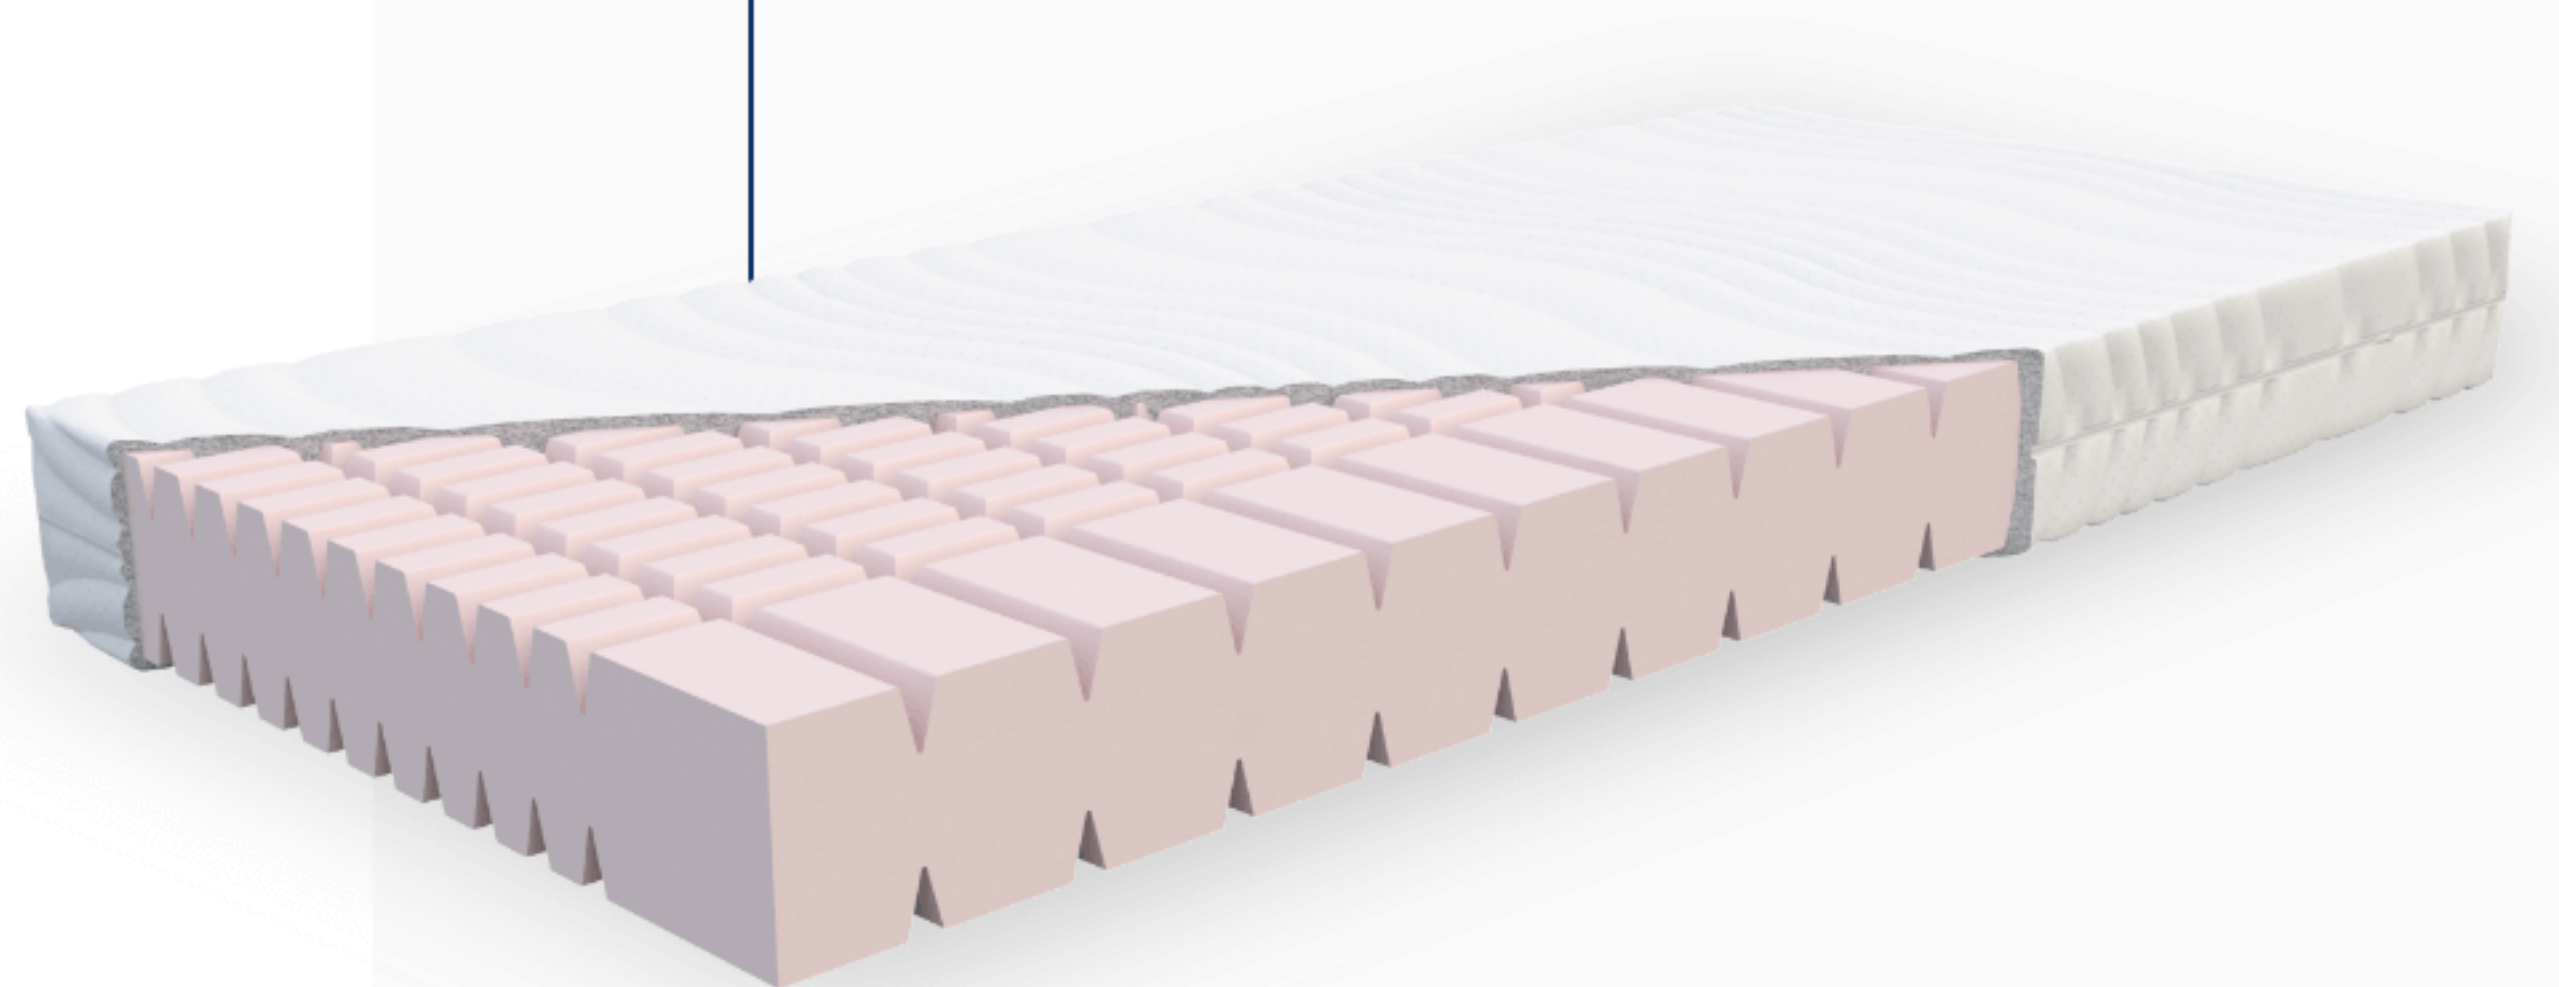

In addition, the open-cell structure of the foam makes the mattress flexible and allows it to adapt well to the body.

A great advantage of this mattress is the use of the TENCEL cover that is soft and pleasant to the touch. This cover is sewn from cellulose fibre, extracted from the eucalyptus tree.

It ensures air circulation and flow of moisture and prevents the growth of bacteria. It is suitable for anyone who likes a healthy and peaceful sleep.

Medium-hard, universal mattress, 20 cm thick, perfect for all those who appreciate good quality at a good price.

It is made of 7-zone HR30 foam, which guarantees exceptional durability and resistance to deformation.

This mattress is a Class 1 medical product, recommended by physiotherapists. It is also suitable for children.

PREMIUM MATTRESS

It fits modern interiors with low bed frames but is also suitable for people after surgeries and with health problems who need to have high beds.

It enables sleeping on both memory foam (VISCO), which adapts to the shape of the body, and on very durable and flexible latex foam.

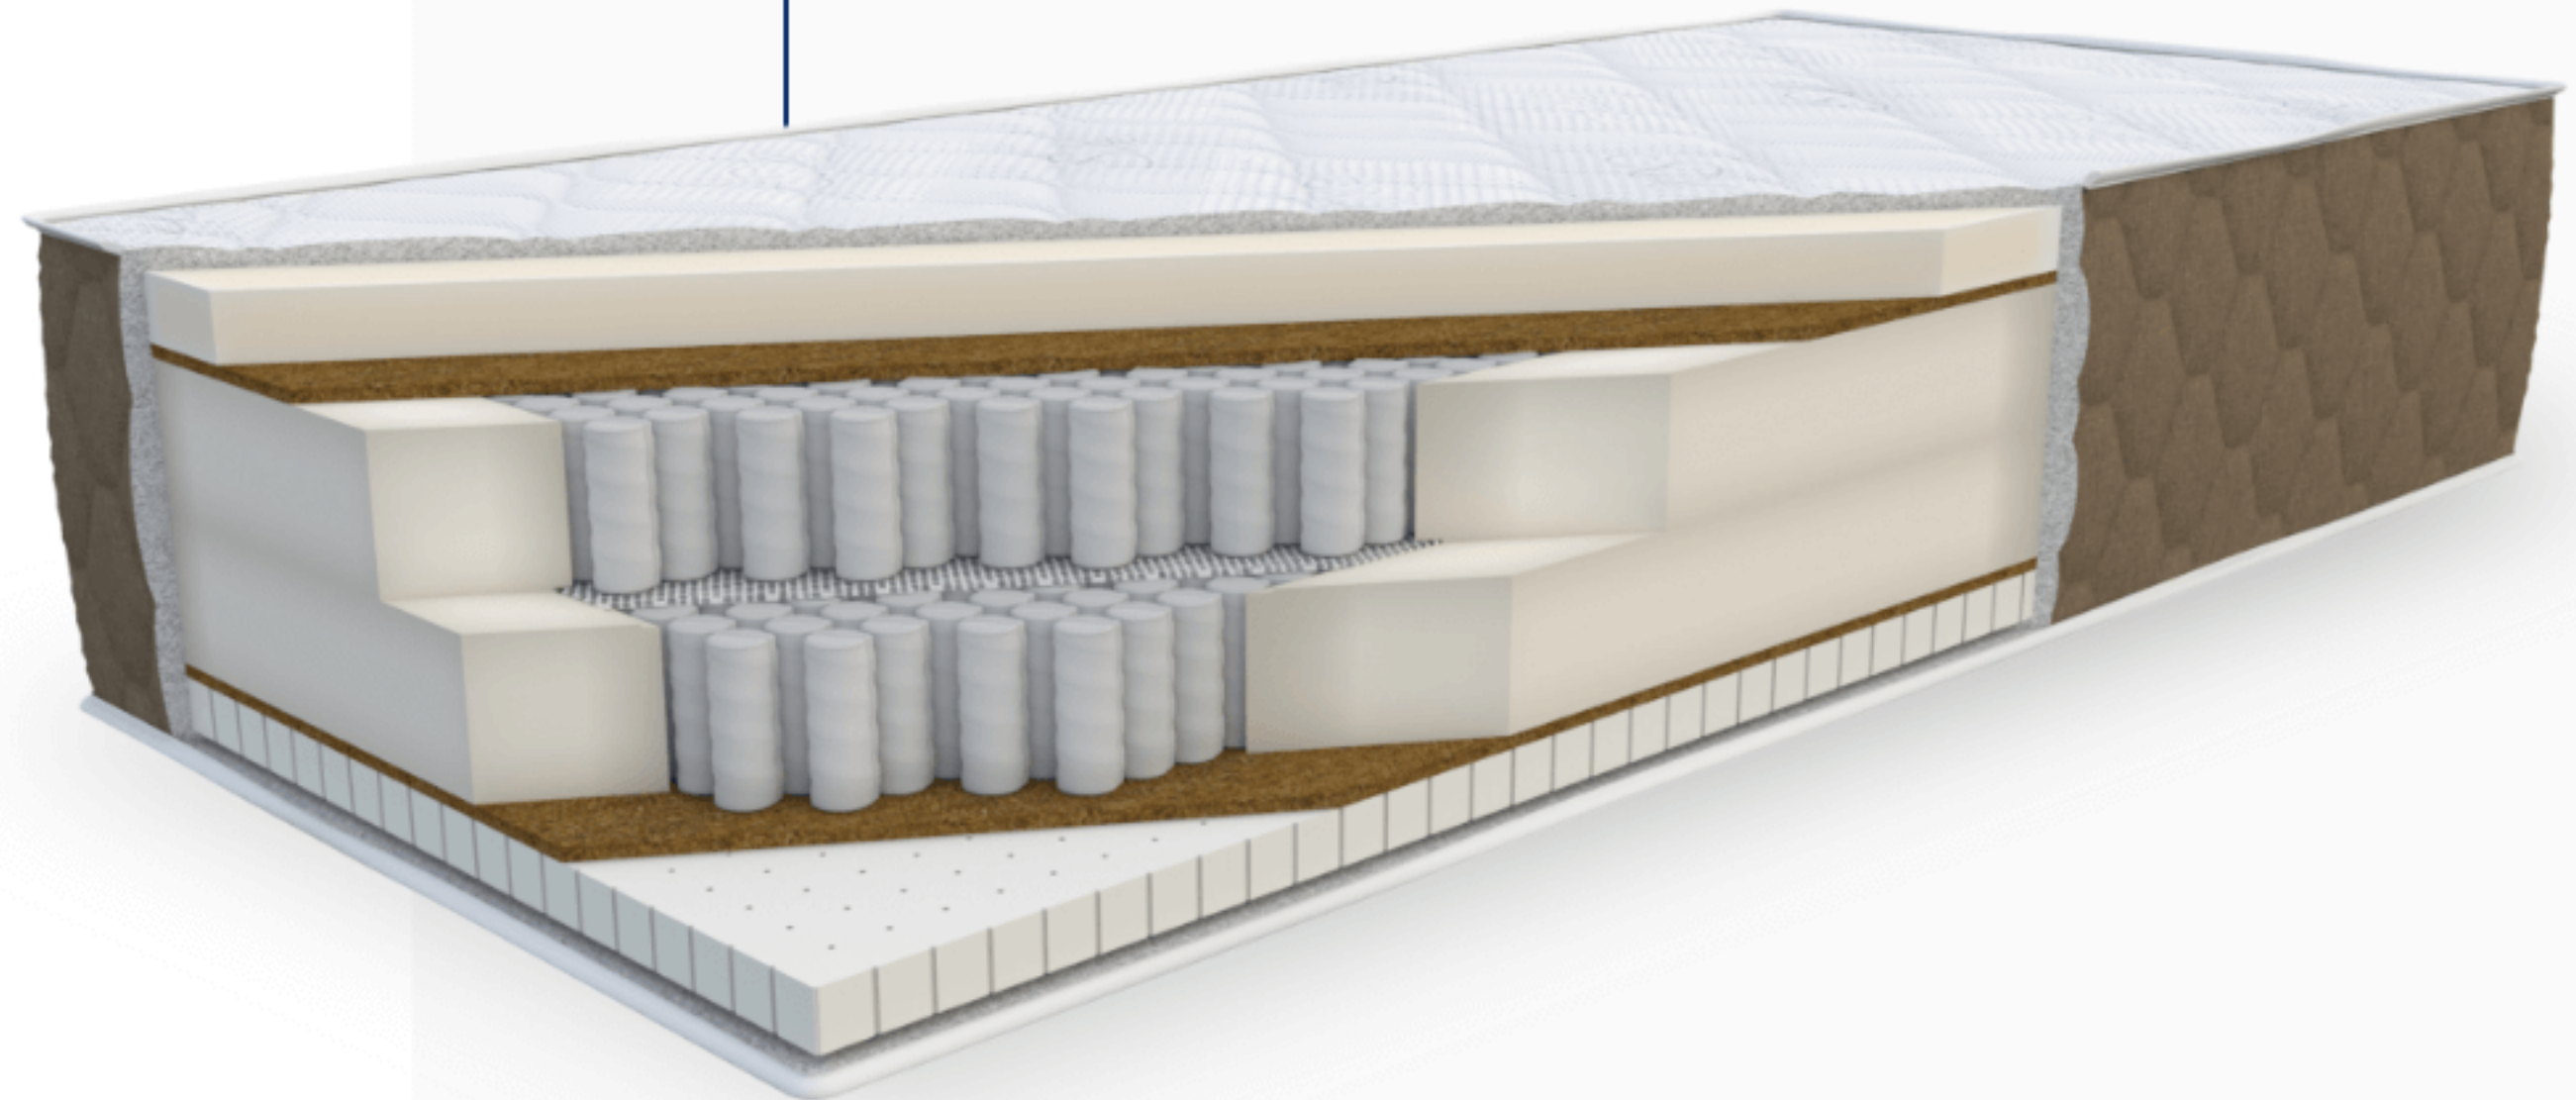

One of its unquestionable advantages is its **extremely pleasant to the touch, quilted SILK cover**, the name of which comes from the admixture of **silk used in the production process**.

It is manufactured in two variants:
hard (with coconut mat) and
medium hard (with felt).

Exceptional mattress for customers with special requirements

It is distinguished by a double layer of springs, which makes it as high as 35 cm

This mattress is a Class 1 medical product, recommended by physiotherapists. It is also suitable for children.
